PERSONAL STATEMENT

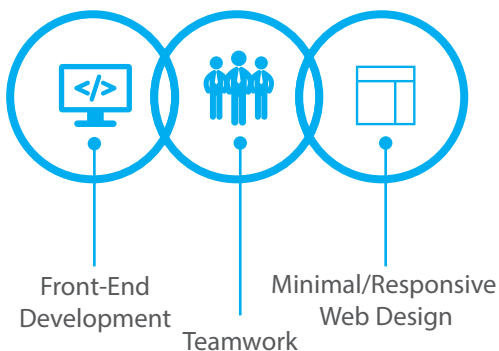

I'm a 22-year-old Web developer from Toulouse (France) currently based in Grenoble.

I love everything that is linked to Web Development & Design, Server Development, Data Visualisation and I have a true interest in new Web technologies (Backbone, React, NoSQL). My curiosity allows me to adapt to any working environment.

I'm currently on my last year of studies, I'm looking for a 6-month internship from February to August 2016. I love working with people, specially if they are passionate.

Why don't we work together? Go further below to see why I am the man you need to hire!

MY SPECIALITIES

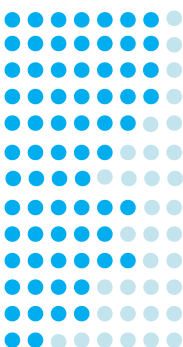

DEVELOPMENT SKILLS

Computer

Knowledge

JavaScript & JQuery
PHP
HTML 5
CSS 3
